* * The Members of Council and Honorary Secretaries are elected from among the Students of The Institution.

The Institution of Civil Engineers

WAS first established, and has since been incorporated by Royal Charter

FOR THE GENERAL ADVANCEMENT OF MECHANICAL SCIENCE,

and more particularly for promoting the acquisition of that species of knowledge which constitutes the profession of a Civil Engineer; being the art of directing the great sources of power in Nature for the use and convenience of man, as the means of production and of traffic in States both for external and internal trade, as applied in the construction of roads, bridges, aqueducts, canals, river navigation and docks, for internal intercourse and exchange; and in the construction of ports, harbours, moles, breakwaters and lighthouses, and in the art of navigation by artificial power for the purposes of commerce; and in the construction and adaptation of machinery; and in the drainage of cities and towns.

CONSTITUTION.

THE INSTITUTION OF CIVIL ENGINEERS shall consist of Members, of Associate Members, of Associates entitled to the privileges of Corporate Membership, and of Honorary Members. All such Members, Associate Members, Associates, and Honorary Members may hereafter be referred to as Corporate Members. The Institution may also have attached to it Associates who are not entitled to the privileges of Corporate Membership, and Students.

MEMBERS shall comprise every person who, on the 2nd of December, 1878, was on the Register as a Member; and every person thereafter elected or transferred into the class of Members. Every Candidate for election or transfer into the class of Members shall be more than thirty-three years of age, and shall come within one of the following conditions:—

He shall either be an Associate Member of The Institution or shall have fulfilled the conditions necessary for Associate Membership. He shall have had, further, five years' employment in positions of responsibility for the design or the execution of important engineering work, and shall be so engaged at the time of his application for election or transfer; or,

He shall satisfy the Council that he has had suitable education and training as a Civil Engineer, and he shall have had, further, at least fifteen years' employment in positions of responsibility for the design or execution of important engineering work, being so engaged at the time of his application for election, and he shall have acquired a considerable degree of eminence in the profession of a Civil Engineer.

ASSOCIATE MEMBERS shall comprise every person who, being a Civil Engineer by profession, was on the register as an Associate on the 2nd of December, 1878, and every person thereafter elected into the class of Associate Members.

Every candidate for election into the class of Associate Members shall be more than twenty-five years of age—he shall have been regularly educated as a Civil Engineer, shall have passed the Studentship and the Associate Membership Examinations of The Institution or such examina-

tion or examinations as are recognized by the Council as exempting therefrom, and shall be actually engaged at the time of his application for election in the design or in the construction of such works as are comprised within the profession of a Civil Engineer as defined by the Charter. Every candidate shall, further, come within one of the four following conditions:—

(a) He shall have been regularly trained under agreement as a pupil or apprentice of a Civil Engineer for at least three years, and he shall have had in addition two years' experience in the design or in the construction of such works as are comprised within the profession of a Civil Engineer, or one year of such experience together with two years' regular work in an Engineering College approved by the Council—one year at least of the foregoing total period of five or six years, as the case may be, having been spent in the office, and one year at least in or upon engineering works; or,

(b) He shall have followed in an Engineering College a regular course recognized by the Council as leading to a degree exempting from the Associate Membership Examination, shall have duly obtained such degree, and shall have had at least two years' training as an articulated pupil or as an apprentice or assistant under agreement to a Civil Engineer—one year at least of this period of two years having been spent in the office, and one year at least in or upon engineering works; or,

(c) He shall have followed in an Engineering College a regular course extending over at least three years recognised by the Council as leading to a degree exempting from the Associate Membership Examination, and shall have had at least four years' experience as an assistant under a Corporate Member—one year at least of this period of four years having been spent in the office, and one year at least in or upon engineering works; or,

(d) He shall have had at least seven years' experience of a character satisfactory to the Council as an assistant to a Corporate Member—partly in the office, and partly in or upon engineering works.

Teachers of Engineering in Colleges which have courses recognized by the Council as leading to degrees exempting from the Associate Membership Examination may be regarded as employed "in the design" of engineering work. Persons who are so employed at the time of their application for election shall have had in addition to the requisite period of pupilage, apprenticeship, or training or experience as an assistant, at least four years' practical experience in an engineer's office or in or upon engineering works.

In the case of candidates otherwise eligible, but who have not passed the Studentship Examination, or an examination recognized by the Council as exempting therefrom, the Council may, up to and including the year 1914, substitute such modified examination in the subjects of general education as they may deem suitable, having regard to the ages of the candidates and other circumstances.

ASSOCIATES ENTITLED TO THE PRIVILEGES OF CORPORATE MEMBERSHIP shall comprise every person who, not being a Civil Engineer by profession, was on the Register as an Associate on the 2nd of December, 1878.

ASSOCIATES NOT ENTITLED TO THE PRIVILEGES OF CORPORATE MEMBERSHIP shall be persons who are not Civil Engineers by profession, but whose pursuits constitute branches of Engineering, or who by their connection with Science or the Arts, or otherwise, are qualified to concur with Civil Engineers in the advancement of professional knowledge.

HONORARY MEMBERS shall be either distinguished individuals, who from their position are enabled to render assistance in the prosecution of public works, or persons eminent for science and experience in pursuits connected

with the profession of a Civil Engineer, but who are not engaged in the practice of that profession in the United Kingdom or its dependencies.

STUDENTS shall be persons not under eighteen years of age, who are, or have been, pupils of Corporate Members of The Institution, who have complied with the regulations as to the admission of Students, and who have the object or intention of becoming engaged in the design or in the construction of such works as are comprised within the profession of a Civil Engineer as defined by the Charter; and such persons may continue Students until they attain the age of twenty-six years, or otherwise until they complete any term of pupilage or apprenticeship or service as an assistant under agreement, upon which they may have entered prior to their admission as Students.

Any Member, Associate Member, Associate, Honorary Member, or Student, having occasion to designate himself as belonging to The Institution, shall state the class to which he belongs, according to the following abbreviated forms, viz., M. Inst. C.E., Assoc. M. Inst. C.E., Assoc. Inst. C.E., Hon. M. Inst. C.E., Stud. Inst. C.E.

ELECTION, TRANSFER, AND ADMISSION OF STUDENTS.

Full particulars of the conditions to be observed, and the procedure to be followed, by candidates for election into The Institution, for transfer to the class of full Members, and for admission as Students, may be obtained by application to the Secretary of The Institution.

CONTRIBUTIONS TO THE FUNDS.

The following Table shows the rates of Annual Subscriptions—those persons being considered Residents whose place of business or whose residence is within ten miles of the General Post Office, London :—

On admission to The Institution every new Member is required to pay a fee of £21, and every new Associate Member and Associate, £10 10s. Every Associate Member on transference to full Membership is required to pay a fee of £10 10s.

EXTRACT FROM BY-LAWS. SECT. VII. CL. 7.—“Any Member, Associate Member, or Associate, whose subscription is not in arrear, may compound for future annual subscriptions by the payment of sixty guineas.”

THE SESSIONS AND MEETINGS.

The Session of The Institution commences annually on the first Tuesday in November, and continues till the end of April. The Ordinary Meetings, to which every Corporate Member has the privilege of introducing one visitor, are held on every Tuesday during the Session, at eight o'clock in the evening. At these meetings Original Communications are read descriptive of some engineering work, or on some branch of the allied sciences; and afterwards the communications are fully and freely discussed. These Papers, and the discussions and correspondence to which they give rise, are embodied in quarterly volumes, which likewise include other Original Communications presented to The Institution, as well as “Abstracts of Papers in Scientific Transactions and Periodicals.” Of these volumes the members of all classes are entitled to receive a copy.
